

PLAY PENDANT

PLAY takes the iconic and recognizable typology of the familiar analogue board game Ludo and brings it into a new context. PLAY is a playful yet simple and functional lamp that works well as a cheerful accent in the home or a softening detail in a formal office setting. The board game reference lends the lamp a nostalgic charm and underscores its informal and playful idiom. PLAY is a pendant lamp where the cone serves as a light reflector that produces a focused light and creates a warm sense of space in a room.
